

# Player Call-Up Policy

## UNITED DFC

Last Updated: 04/10/2018

### Policy

- At the Prospects level, due to Player Pooling, if a call-up is needed to make numbers, then a player will be used from another team at the same level. For example, U10 need a call-up, then they will use a player from one of the other U10 teams
- U12SNS WC level will fall under the Performance policy for call-ups.
- At the Performance level, if a call-up is needed, then teams will look at the level immediately below themselves. An example of this could be if the U15aa team needs a call-up, then they would use a player from the U15a team.
- At Performance level, if a player from the appropriate level can not be found, then the next place to call a player up from would be the year below. For example, U15aa need a player and a player from u15a is not available, then they can call from the year below such as U13aa.
- To complete a call-up, the coach of the calling-up team must contact both the coach of the team from which the player plays regularly and the Technical Staff of the that program. BOTH must be contacted before contacting the player.
- The player called-up will be a player that is performing well within their current team.

### Priorities

When call up opportunities conflict with team events, the following priorities will take place:

Higher level practice conflicts with team game	Player will attend his/her team game
Higher level practice conflicts with team practice	Player will attend his/her team practice
Higher level game conflicts with team game	Player will attend his/her team game
Higher level game conflicts with team practice	Player will attend higher level game

However, if higher level games conflict with team practices on a frequent basis, a discussion will need to occur between coaches of both teams and the technical director to decide how often that player can attend the higher level games.
